

The Comprehensive Email Archiving Platform for Addressing Today's Challenges of Email Growth, E-discovery, and Compliance

Email continues to be one of the most critical, and most scrutinized, applications in use today. The vital importance of email puts a massive load on IT administrators, who have to...

- Minimize the operational expense of maintaining email server farms.
- Mitigate the organization's e-discovery risks, which have been accentuated by recent changes in the Federal Rules of Civil Procedure.
- Address compliance mandates that now require the long-term retention of a firm's electronic communications.

Atempo Digital Archive for Messaging is a comprehensive email archiving platform that can address all your requirements—whether you need to streamline mailbox management, improve litigation and e-discovery support, or comply with SEC, NASD, NYSE, HIPAA, Sarbanes-Oxley internal policies or other mandates.

An Answer to Each Archiving Need

Mailbox Management

Offering full, seamless integration with email clients, Atempo Digital Archive for Messaging enables users to easily and proactively migrate email data from servers to an archive platform that is cheaper and easier for IT to maintain. As a result, end users get the benefit of nearly infinite mailbox capacity, while the IT department sharply reduces operational expenses. End users can search for any of their historical email using the rich search criteria set, which features easy-to-use search functionality. Additionally, Atempo Digital Archive for Messaging offers power users and administrators a range of robust search capabilities—including department-level search, scoped text-based searching, filtering on internal or external mail, and support for mail groups and multiple email addresses per user.

E-discovery

Today, e-discovery requirements are an essential part of federal civil litigation cases. Rules of Civil Procedure (December 2006) require companies, within 100 days of filing a civil complaint, to disclose their electronic document retention policies and procedures and to explain any inaccessible content. Atempo Digital Archive for Messaging fulfills this

requirement, ensuring that all electronic information is quickly and readily available upon request by civil litigants.

Since Atempo Digital Archive for Messaging provides the richest set of query options, you'll have more successful results, reducing legal expenses. It allows for multiple retention policies and litigation holds per communication, guaranteeing clients that their archives are always up-to-date and contain only those documents that the organization requires. These policies and holds can be applied proactively at archive time, or reactively at a later date. In addition, content lifecycle retention policies can be modified retroactively.

Compliance and Supervision

The regulatory compliance needs of most companies are driven by one or more regulations, such as those from the SEC, NASD, NYSE, HIPAA and Sarbanes-Oxley. Atempo Digital Archive for Messaging fulfills all regulatory requirements for its clients through the use of functionally complete and robust modules in the areas of electronic communications pre-filtering, rapid retrieval, retention policy management, and electronic communications supervision (both keyword-based and random percentage sample)—all with full audit control and tracking.

Key Features and Benefits

Atempo Digital Archive for Messaging is a scalable, easy-to-use, and open solution that offers superior functionality for each facet of email archiving. Clients use Atempo Digital Archive for Messaging to lower the operational costs of their email server farms, minimize e-discovery risk and expense, and satisfy their regulatory compliance obligations. Atempo Digital Archive for Messaging has established itself as a best-in-class electronic communications archiving solution—offering advanced features such as seamless mailbox management, extremely rich selection criteria, efficient single-instance storage and compression algorithms, and fully integrated data mining and business intelligence tools. The solution leverages an architecture that is infrastructure agnostic, scalable, and easy to integrate with third party applications—all delivered in a solution that has a very small footprint.

Easy to Install and Use

Installation is accomplished in hours—as opposed to the days or weeks required by most email archive solutions.

Infrastructure Agnosticism

Atempo Digital Archive for Messaging supports a wide range of operating systems, JDBC-compliant relational databases, email servers, and storage solutions. With its open architecture, the solution is very easy to integrate with third-party applications.

Single Instance Storage

Atempo Digital Archive for Messaging optimizes storage by not only eliminating duplicate emails, but duplicate attachments as well.

Storage of Email Archiving and Instant Messaging Communications

Atempo Digital Archive for Messaging supports the archival of all electronic

communications, including emails, instant messages, faxes, text messages, and more.

Full Content Indexing and Search

All data is fully text indexed for rapid retrieval. Atempo Digital Archive for Messaging indexes each component of an email (subject, body, attachment file names, attachment data, and attachment meta-data) separately to support scoped, text-based search criteria throughout the archival life cycle.

Powerful Retention Policy Manager

Atempo Digital Archive for Messaging has a rich set of search criteria that can be used to apply any number of retention policies per email. The retention policies can be applied during archiving of electronic communications or retroactively to existing data.

Small Footprint and High Scalability

Atempo Digital Archive for Messaging uses a small IT infrastructure footprint compared to competing products, yet scales horizontally to support large enterprise installations.

Multi-tenancy Capabilities

The multi-tenancy capability allows clients to host any number of companies' archives within a single instance of Atempo Digital Archive for Messaging. This feature is ideal for service providers, such as datacenter hosts, who may have many clients.

Supported Configurations

- OS: Microsoft® Windows® 2003 Server and XP, Linux®, UNIX
- Java®: JDK 1.6 or higher
- Application servers: Apache Tomcat 6, BEA Weblogic 10, jBoss 5
- Email servers (with stubbing support): Microsoft® Exchange 2003, Microsoft® Exchange 2007, and email servers that support the IMAP protocol

- Email servers (only archiving): any email server on the market
- Web browsers: Microsoft® Internet Explorer® 6 or higher, Mozilla® Firefox® 1.07 or higher, Mozilla® 1.7.12 or higher, Apple Safari 2 or higher, AOL® Netscape® 8 or higher
- Microsoft® Outlook® (for add-in): 2003, 2007
- Microsoft® Entourage® (for add-in): 2008
- Email file storage formats: eml, pst, msg, maildir, mbox

Please refer to the Atempo Compatibility Guide for the current list of supported systems.

About Atempo

Atempo enables organizations to protect, manage, archive, and recover digital information simply and effectively, across any infrastructure, on any platform, over any period of time. Atempo provides a comprehensive portfolio of integrated software solutions, including backup and recovery of servers, continuous data protection of workstations and laptops, and long-term archiving of files and email messages. Atempo simplifies the management of data throughout its entire lifecycle by providing unprecedented visibility and control over data growth, infrastructure cost, and risk mitigation. Atempo serves thousands of customers around the world through a sales and support network of over 200 resellers and partners.
